-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Reopening of Prosecution/Withdrawal of Final Rejection and Allowable Subject Matter***

After reconsidering the prior art of record, namely the EP 07901688 reference, the Examiner has determined that a new ground of rejection should be made over the claims as filed on August 2, 2005. Therefore, the FINALITY of the rejection of the last Office Action, dated May 3, 2005, and the indication of allowable subject matter has been WITHDRAWN. In view of the discovery of the above-cited art, PROSECUTION IS HEREBY REOPENED as set forth below.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0791688.

EP 0791688 discloses all that is recited in the claims since it teaches a wrapper paper for a smoking article, wherein the paper can have a weight of  $70 \text{ g/m}^2$ , and a calcium carbonate content of 60% of the paper weight – which means  $42 \text{ g/m}^2$  (corresponding to the claimed “at least  $30 \text{ g/m}^2$ ”). The paper also can contain a chemical additive, comprising potassium citrate or sodium citrate, in the amount of from 0.3-10% by weight of the paper (corresponding to the claimed “at least 3% by mass of

burn adjusting agent"). While EP 0791688 may not specifically state that an ash content in a surface layer on at least one side of the wrapper paper, or on each of a top side and a bottom side of the wrapper paper, is not higher than 35% by mass, this claim recitation is not deemed to patentably distinguish the claims from the EP reference because where the prior art product is identical or substantially identical in structure or composition, a *prima facie* case of either anticipation or obviousness has been established. *In re Best*, 562 F.2d 1252, 1255, 195 USPQ 430,433 (CCPA 1977). In other words, when the structure recited in the reference is substantially identical to that of the claims, the claimed properties or functions are presumed to be inherent. Absent any extrinsic evidence to the contrary, one having ordinary skill in the art would expect that the cigarette wrapper of EP 0791688 would also exhibit the claimed ash parameters, since, structurally, the claimed wrapper paper and that of EP 0791688 are practically identical, in that they both have the same calcium carbonate and burn adjusting agent compositions.
